Real-time Systems (Echtzeitsysteme)

Josef Pauli

Universität Duisburg-Essen
Fakultät für Ingenieurwissenschaften

Contents at a glance

1. Introduction to Real-time systems
   • Basic definitions, characteristics, and difficulties

2. Computers in Real-time systems
   • Real-time entities, abstractions, errors

3. Programming using High-level Languages
   a. Programming languages for RT systems
   b. Programming in the small
   c. Programming in the large
Contents at a glance

4. Concurrency
   a. Basics of Concurrency
   b. Concurrency in Ada, Java
   c. Concurrency in POSIX/C

5. Scheduling
   a. Introduction
   b. Schedulability analysis
   c. POSIX/C and RT Java
